Summary

Computer Science Engineering undergraduate at VIT Chennai with internship experience in software development and proven leadership in technical communities. Recognized for quickly adapting to new technologies, collaborating effectively in team environments and taking ownership of projects from ideation to implementation. Eager to contribute to challenging software engineering roles while continuously learning and delivering practical, high-quality solutions.

Education

Vellore Institute of Technology, Chennai, B.Tech in Computer Science Engineering
- CGPA: **8.68/10.0**

Indore International School, Indore, CBSE 12th Standard
- Percentage: **81.2%**

Keshav International School, Jhabua, CBSE 10th Standard
- Percentage: **90.6%**

Work Experience & Leadership

Software/IT Intern, BAI × The Meera
- Developed a hospitality platform using Next.js and Tailwind CSS with a focus on responsive design and user experience.

Java Developer Intern, Navodita Infotech
- Built a quiz management system using Java Spring Boot, HTML/CSS and SQL, featuring notes and feedback modules.

Vice-Chairperson, Android Club - VIT Chennai
- Led a 120+ member community by organizing workshops & events on Android Development, UI/UX and Web Development.

Hackathons, Organizer & Volunteer
- Organized Hack-N-Droid, the flagship Android Club hackathon, for 500+ participants across Tamil Nadu.
- Led promotions for Pitchathon (350+ registrations) and managed registrations for CodeVolt (400+ participants) while serving as a core organizing volunteer across multiple hackathons.

Projects

DoctorNow: Web-based healthcare platform for appointment booking, medicine ordering and secure medical report storage. Built using React, Python and SQL with an intuitive user interface and efficient data management.
Quizeria: Web-based quiz management system built using Java Spring Boot, Thymeleaf, HTML/CSS and SQL. Features include user login, quiz management, notes, feedback and role-based access for different users.
DeepGuard: AI-assisted web application for detecting image and audio deepfakes using React and PyTorch. Provides a simple interface for uploading files and viewing prediction results.
System Monitor: Terminal-based system monitoring tool developed in Python using Rich and psutil libraries to display real-time CPU, memory, disk and network usage.

Certifications

Oracle AI Database SQL Certified Associate: Database fundamentals, SQL querying and Oracle AI database concepts.
IBM Cybersecurity Analyst Certification: Core concepts of cybersecurity, network security, and incident response.
AWS Certified Cloud Practitioner: Fundamentals of AWS Cloud & Services with AWS Well-Architected Framework.
NPTEL Certifications: Wildlife Ecology, Conservation Economics, and Education for Sustainable Development.

Skills

Programming Languages: Python, Java, C/C++, JavaScript, SQL & NoSQL.
Frameworks & Tools: React, Next.js, Tailwind CSS, Spring Boot, AWS, GitHub, Prompt Engineering.
Computer Science Fundamentals: Data Structures & Algorithms, Object Oriented Programming, Database Systems, Operating Systems, Computer Networks, Software Engineering, Cybersecurity basics, Computer Architecture & Organisation.
Soft Skills: Problem-Solving, Time Management, Work-ethic, Adaptability, Creativity, Team Collaboration & Communication.
